# Star trek fleet command cheats

PC | Submitted by Pikablukid First start the campaign game, every race & era will do. If you play as a late-period association, you will start with F-FF frigate. Then save the game & output to the windows. (Each ship will do as long as you remember the ship's class.) Open the file named sfbspc13.txt and it is located in the resource\specs\sfbspc13.txt in the game's main directory using Exel. Find bpv. For F-FF BPV, it changes to 1000 or more. Save and get back in the game. Then go to the Shipyard menu. You will notice that the store with the value of your ship is high. Shop in your ship, big or small your choice and in return you will also get extra prestige from balance. You can repeat it over and over again. Prestige Points 2 First start the campaign game, all races & era will do. If you play as a late-period association, you will start with F-FF frigate. Then save the game & output to the windows. (Each ship will do as long as you remember the ship's class.) Open the file named sfbspc13.txt and it is located in the resource\specs\sfbspc13.txt in the game's main directory using Exel. Find bpv. For F-FF BPV, it changes to 1000 or more. Save and get back in the game. Then go to the Shipyard menu. You will notice that the store with the value of your ship is high. Shop in your ship, big or small your choice and in return you will also get extra prestige from balance. You can repeat it over and over again. Change all starlad configuration data (weapon, shields, engines, ect.) is stored in a restricted text file that excel can access. The file is called sfbspc13.txt and is located in the property\specs\sfbspc13.txt in the game's main directory. By modifying these fields, you can make any ship have all kinds of functions. Add the clogging capability. Change the power level of the engine. Add boats and fighters. Add/replace weapons. Change the shield level. Add more transporters, troops, mines, ect. ... and much more. Before you change it, save the original file to a secure location so that you can return to its original configuration. You will also need to remove the read-only attribute from the file. (This is done by using the sfbspc13.txt. When playing a multiplayer, all players must have the same file (modified or not) to play. Here are some tips for changing the sfbspc13.txt file. 1. The largest I have tested the engine output on is 120 each. I know federation ships can't do more than 150. The engine values are located in the following areas: R_L_Warp, C_Warp, Impulse, Apr, Battery. 2. Shields can be changed to very high values for Federation ships (2000), but klingon ships do not appear to be able to reach this high. Shield values are located in the following areas: Shield 1, Shield 2_6, Shield 3_5, Shield 4, Total Shields. Shields cover each 6-page ship. Therefore, the values in the 2_6 & Shield3_5 each represent 2 sides of the ship. Value Place in Shield Total = shield 1 + shield2_6 x 2 + shield3_5 x 2 + Shield4. 3. A weapon may be turned into any species within an existing group. You can also change the number of weapons (up to 4) within an existing group (missiles can take up to 7). You can't add new groups of weapons. You can only change the existing weapon hard points. Weapons are arranged in these areas: heavy weapons (photons, rockets, plasma, ect) and weapons (phasers, disruptors, ect). The arcs of the weapon vary, but I know that if you place all the value as an arc, the weapon will fire from any angle. 4. The knead is very easy to add to any ship. Just go to the area that reads Cloak num and place a value for how much energy you want to cost to run the umbrella. 5. Shuttles are defined as basic and max values. The base value is the maximum value divided by 3. I successfully made the maximum value of all different types of 30 shuttles and a base value of 10, which allowed me to purchase quantities of 10.20, or 30 shuttles of each type, while in spacedock during the game. By changing the value of the launch rate, you can determine how many space shuttles can launch before the ship needs to recharge for multiple launches. If you want to add fighters to any ship just find an area that says hunting bay 1 to 4 and place a value of 6 (higher than 6 will cause the game to crash) in each of the areas and you will have 4 hunting groups by 6 hunters each! 6. Movement is defined in the turn mode and moving costs areas. The best value turn mode is AA. This will give you a very agile ship. The cost of moving determines how much energy is used for movement. The best value I've ever seen for that is .25. Star Trek Fleet Command Hack [2020 WORKING] Unlimited Latinum Android | Ios! 100% deloDans, we get Star Trek StarFleet Command Hack at your service. This is really a Star Trek Fleet Command ONLINE Hack that could create an unlimited number of Latinums at your account games. Go to the generator: is the only place online to get work fraudsters for Star Trek Fleet Command and become the most effective player in this great game. If you want to take your game to a different level and improve your chances of winning, you must use it for free now our amazing Star Trek Fleet Command Hack Online Cheat Tool. Star Trek Fleet Command Cheat Tool can be obtained for your Android or iOS device, has a user-friendly interface and is easily manageable. This Star Trek Fleet Command hack online generator is undetectable due to the proxy connection and our security system. It's a 128-bit SSL that prodLatinume your account as securely as you're able to, so don't bother about the ban. Our Star Trek Fleet Command Hack has a very simple interface for prodLatinume is easy to use. Our hacks are always up to date and are made for each of the iOS and Android devices. With unlimited latinum you will dominate the star trek and win all This is really a key reason why many top in the common game uses our tool. Star Trek Fleet Command Hack Generator Screenshot!!! Use Star Trek Fleet Command Hack cheats online generator for players to get LatinumStar Trek Fleet Command Hack Tool available for Browser, Android and IOS, this will allow you to get unlimited Latinum, easy to use and without download. This Generator Star Trek Fleet Command Cheat was established by the famous UNV Game Cheat team and will allow you to add as much Latinum as you want offline and remotely directly online, as our Generator sends processed data to get information from official game servers. So if you are stLatinumk somewhere, or just for fun, or go over the level where you fight or become one of the best players using our Generator and get whatever you want. Our Encrypt Data Generator to provide maximum protection and minimal risk. Go to : you prefer not to buy a Latinum just get them for free? Do you need an updated Star Trek Fleet Command Hack that worked on their current version? Well, it's so easy that a 10-year-old can do it! And it's really a pick for the Latinum you can get ahead in this game. But there are few problems that most people have encountered, the late Star Trek Fleet Command Hack fraudsters are one of them. This new version of our Star Trek Fleet Command Hack Tool will never run out of Latinum again. Our developers have made sure that our Star Trek Fleet Command fraudsters will let you enjoy the potential of this top action game in star trek fleet command fans know that every player wants a better equipe or players.
